

SynerComm & Juniper Partnership

Why Juniper Driven by Mist AI?

The Mist AI platform makes networking predictable, reliable, and measurable with unprecedented visibility into user experience. Better yet, time-consuming IT tasks are replaced with AI-driven proactive automation and self-healing solutions, lowering networking operational costs and saving you substantial time and money. Mist AI components include:

- Marvis Virtual Assistant
- WiFi Assurance
- Wired Assurance
- WAN Assurance
- Premium Analytics
- User Engagement
- Asset Tracking

How SynerComm's Cybersecurity Services Supplement 'Gaps' in the Juniper Ecosystem

STAFFING AUGMENTATION

SynerComm maintains a roster of highly skilled and experienced consultants, allowing you to augment your team and close skill gaps.

ADVERSARY SIMULATION

Don't wait for a real attack to find out your weaknesses. Let our experts create a zero-stakes environment that simulates an attack so that you can identify and resolve potential problems.

INFRASTRUCTURE MANAGEMENT

When you need a network with no downtime or maintenance, our experts can help maintain and troubleshoot your infrastructure.

VULNERABILITY MANAGEMENT

Minimize your attack surface and safeguard your digital assets with the help of our vulnerability management team.

PENETRATION TESTING

Our team of cyber security experts is here to help you identify vulnerabilities before criminals can take advantage of them. Safeguard your digital assets.

CONTINUOUS ATTACK SURFACE MANAGEMENT (CASM)

Our experts look for new threats that may impact your company and make sure your team is prepared to take the right steps to protect your data and IT infrastructure.

SynerComm's ImplementIT for Logistics

The issues of long-distance networks, such as spotty communication between sites, equipment loss or malfunction, and varied software and firmware configurations are a challenge for all large-scale installations.

We provide a complete solution for all of your repair, maintenance, and renovation needs. Our team of specialists has the knowledge and skills you need to keep everything working smoothly.

- Project management expertise
- Centralized portal
- Equipment and site validation
- Equipment staging, storage, and asset tagging

SynerComm's Asset Management & IT Portal

Manage all of your network assets and maintenance plans in one central location.

Access a complete history of quotes and purchases. SynerComm's Portal contains all of the information your staff requires, from product serial numbers to vendor End of Support dates.

Browse, search, filter, sort, export all of your data, and empower your team to find the information they need to maintain and network infrastructure.

Receive email alerts for upcoming expirations and renewals.
